

ARRIVING TO FORCHEM

When arriving to Rauma follow the road instructions for the truck traffic to the forest industry (*Metsäteollisuus*); arrival via Mittaportti (address Hankkarintie, Rauma). Then, follow the instructions to Forchem.

On arrival to the Forchem Plant:

Contact the control room of the plant!

- ▲ Document checking and signing into the system
- ▲ Get the weighing sticker
- ▲ Operators will give you a loading permission

Drivers loading tall oil rosin: **Be careful - this is elevated temperature material (>200 °C)!** The container or the tank must be preheated before loading of elevated temperature material!

Forchem can offer electrical heating possibility or low-pressure steam for preheating. If heated by steam, make sure there is no condensate water left in the tank!

LANGUAGE

The language requirement is **English or Finnish!**

Otherwise interpreter is required!

SAFETY

All subcontractors operating at the Forchem production facility area **MUST follow the safety instructions/rules and wear following personal protective equipment;** helmet, safety glasses, protective clothing and gloves!

CONTAINER CLEANLINESS

The appointed container / tank must be clean and dry at arrival. **Driver must have a cleaning certificate with him written in English or Finnish indicating where, when and how the container / tank was washed and dried and showing previous load.** Cleaning certificate should preferably be according to EFTCO- or SQAS standards (others accepted with consideration).

Forchem staff is entitled to make random check-ups for containers / tanks and guide to a nearest washing station if found necessary.

Please also note the following:

- ▲ Smoking is only allowed at designated smoking areas
- ▲ If any questions or help needed contact Forchem staff
- ▲ In case of leakage contact first Forchem staff
